

# How to Succeed as an Agile Leader

## **Optimise Project Deliverables and Avoid Waste**

Be clear on client expectations and avoid adding in excessive information, unnecessary data, or overcomplicating the project.

## Practice Qualitative Risk Analysis

Performing a risk analysis before the start of a project can mitigate future risks and help you deliver a more agile and efficient project.

## Sanctify Project Prioritisation

Create a list of priority projects or tasks and focus resources on those activities with higher added value.
